The future exploration and development activities of the Company may be affected by a range of factors, including geological conditions, limitations on activities due to seasonal weather patterns, unanticipated operational and technical difficulties, industrial and environmental accidents, native title process, changing government regulations and many other factors beyond the control of the Company.</p> <p>(c) <b>Future capital and funding requirements:</b> The Company has no operating revenue and is unlikely to generate any operating revenue unless and until its projects are successfully developed and production commences. The future capital requirements of the Company will depend on many factors including its business development activities. - (b) the issue of up to 11,111,111 Shares to the Directors and certain management personnel (or their respective nominees) (**Tranche 2 Participants**) at an issue price of \$0.045 per Share (**Tranche 2 Placement Shares**), with one free-attaching Quoted Option for every 2 Tranche 2 Placement Shares subscribed for under the Placement (**Tranche 2 Quoted Options**) (collectively, the **Tranche 2 Securities**) raising up to approximately \$500,000 (before costs).

The Tranche 2 Securities comprise the following issues:

Director / Management	Tranche 2 Placement Shares	Tranche 2 Quoted Options
Jeremy Robinson and Cameron Henry <sup>(1)</sup>	6,666,667	3,333,333
John Young	1,266,667	633,333
Shaun Hardcastle	555,556	277,778

**Note:**

1. Subject to Shareholder approval, Mr Robinson and Mr Henry's Tranche 2 Securities will be held jointly via Churchill SIG Pty Ltd, of which both Mr Robinson and Mr Henry are shareholders and Mr Robinson is the sole director.

The Placement Shares were issued on 11 May 2023 using the Company's available 15% placement capacity under ASX Listing Rule 7.1 and 10% placement capacity under ASX Listing Rule 7.1A. The Placement Shares issued under the Placement were offered to sophisticated and professional investors without disclosure under the Corporations Act.

The Tranche 2 Securities to be issued to the Directors (or their respective nominees) are subject to Shareholder approval pursuant Listing Rule 10.11 at an upcoming general meeting to be convened shortly (**Meeting**). The Tranche 2 Securities to be issued to certain key management personnel (or their respective nominees) are subject to Shareholder approval at the Meeting pursuant Listing Rule 7.1.

Meeting, the Company intends to issue a separate prospectus in connection with an offer to Tranche 2 Participants for the Tranche 2 Quoted Options.

The Company expects the issue of the Quoted Options to occur on or around 26 May 2023.

## **1.2 The Offer**

The Company is offering pursuant to this Prospectus, up to approximately 44,444,474 Quoted Options exercisable at \$0.0675 per Quoted Option and expiring two (2) years from the date of issue (**Offer**).

Only parties that were issued Placement Shares may apply for Quoted Options under the Offer.

No funds are payable under the Offer.

An Application Form in relation to the Offer will be issued to the person eligible to receive Quoted Options under the Offer (or their nominees) together with a copy of this Prospectus in electronic form.

Applications for Quoted Options under the Offer must be made on the Application Form accompanying this Prospectus and received by the Company on or before the relevant Closing Date.

No funds will be raised as a result of the Offer as the Quoted Options are offered on a free-attaching basis to the Shares issued under the Placement.

The Company will apply for quotation of the Quoted Options (see Section 1.8).

## **1.3 Purpose of the Offer**

The primary purpose of the Offer is to remove the need for an additional disclosure document to be issued upon the sale of any Shares that are issued upon conversion of any Quoted Options that are issued under the Offer and to facilitate the quotation of the Quoted Options.

The Offer is being made such that the relief provided under ASIC Corporations (Sale Offer That Do Not Need Disclosure) Instrument 2016/80 with respect to the on-sale provisions of section 707 of the Corporations Act is available.

Specifically, if the Quoted Options are issued with disclosure under this Prospectus, then the Shares issued upon the exercise of any of the Quoted Options can be on-sold within 12 months of their issue, without a disclosure document for the on-sale offer.

## **1.4 Opening and Closing Dates**

The Company will accept Application Forms from 25 May 2023 (**Opening Date**) until 5.00pm (WST) on 26 May 2023 or such other date as the Directors in their absolute discretion shall determine, subject to the requirements of the Listing Rules (**Closing Date**).

## **1.5 Minimum subscription**

There is no minimum subscription for the Offer.

## **1.6 Withdrawal of Offer**

The Company reserves the right not to proceed with the Offer at any time before the issue of Quoted Options.

## 1.7 Issue date

The Quoted Options will be issued only after ASX has granted permission for the Quoted Options to be quoted. It is expected that Quoted Options will be issued on 26 May 2023 and trading of the Quoted Options on the ASX is expected to commence on 29 May 2023.

It is the responsibility of Applicants to determine their allocation prior to trading in the Quoted Options. Applicants who sell Quoted Options before they receive their holding statements do so at their own risk.

## 1.8 ASX quotation

An initial application has been made to the ASX for Official Quotation of the Quoted Options by the way of an Appendix 3B announced on the ASX market announcements platform on 5 May 2023. The Company intends to submit an Appendix 2A for Official Quotation of the Quoted Options on or around 26 May 2023.

The Quoted Options offered under this Prospectus will only be admitted to quotation by ASX if the conditions for quotation of a new class of securities are satisfied, which include (amongst other things):

- (a) there being a minimum of 100,000 of the Quoted Options on issue; and
- (b) there are at least 50 holders with a marketable parcel (within the meaning of the Listing Rules).

If the Quoted Options to be issued under this Prospectus are not admitted to quotation within a period of three months from the date of this Prospectus, any Quoted Options issued will be void in accordance with section 723 of the Corporations Act.

The fact that ASX may grant Official Quotation is not to be taken in any way as an indication of the merits of the Company or the Quoted Options offered pursuant to this Prospectus. ASX takes no responsibility for the contents of this Prospectus.

## 1.9 CHESS

The Company participates in the Clearing House Electronic Sub-register System, known as CHESS. ASX Settlement Pty Limited, a wholly owned subsidiary of ASX, operates CHESS in accordance with the Listing Rules and the ASX Settlement Operating Rules.

Under CHESS, Applicants will not receive a certificate but will receive a statement of their holding of Quoted Options.

If you elect to hold your Securities on the CHESS sub-register, ASX Settlement Pty Limited will send you a CHESS statement.

If you elect to hold your Securities on the Issuer Sponsored sub-register, your statement will be despatched by the Share Registry.

The statements will set out the number of existing Securities held (where applicable) and the number of new Quoted Options allotted under this Prospectus and provide details of a Shareholder's holder identification number (for Shareholders who elect to hold Securities on the CHESS sub-register) or Shareholder reference number (for Shareholders who elect to hold their Securities on the Issuer Sponsored sub-register).

A CHESS statement or Issuer Sponsored statement will routinely be sent to Shareholders at the end of any calendar month during which the balance of their Shareholding changes. Shareholders may request a statement at any other time; however, a charge may be made for additional statements.

Completed Application Forms must be lodged at any time after the issue of this Prospectus and on or before the Closing Date.

### **2.2 Acceptance of Application**

Acceptance of a completed Application Form by the Company creates a legally binding contract between the Applicant and the Company for the number of Quoted Options accepted by the Company. The Application Form does not need to be signed to be a binding acceptance of Quoted Options.

If the Application Form is not completed correctly it may still be treated as valid. The Directors' decision as to whether to treat the Application as valid and how to construe, amend or complete the Application Form is final.

By completing and returning your Application Form, you will be deemed to have represented that you are entitled to apply for Quoted Options under the Offer. In addition, you will also be deemed to have represented and warranted on behalf of yourself or each person on whose account you are acting that the law in your place of residence and/or where you have been given the Prospectus, does not prohibit you from being given the Prospectus and that you:

- (a) agree to be bound by the terms of the Offer;
- (b) declare that all details and statements in the Application Form are complete and accurate;
- (c) declare that you are over 18 years of age and have full legal capacity and power to perform all your rights and obligations under the Application Form;

- (d) authorise the Company and its respective officers or agents, to do anything on your behalf necessary for the Quoted Options to be issued to you, including to act on instructions of the Share Registry upon using the contact details set out in the Application Form;
- (e) declare that you have a registered address in Australia, or another country which permits the Company to make the Offer to you without the requirement to lodge any documents with your local regulatory authority;
- (f) acknowledge that the information contained in, or accompanying, the Prospectus is not investment or financial product advice or a recommendation that Quoted Options are suitable for you given your investment objectives, financial situation or particular needs; and
- (g) acknowledge that the Quoted Options have not, and will not be, registered under the securities laws in any other jurisdictions outside Australia.

#### 3.2 Use of funds

No funds will be raised as a result of the Offer.

The Company will receive \$0.0675 for each Quoted Option exercised. If all Quoted Options are issued and exercised, the Company will receive approximately \$3,000,000 (before costs). There is no certainty that any of the Quoted Option will be exercised.

It is currently intended that any funds raised by the exercise of the Quoted Options will be applied towards:

- (a) resource definition drilling;
- (b) completion of a definitive feasibility study for Stage 1 phosphate DSO development;
- (c) completion of a pre-feasibility study for the fully-staged Cummins Range Project; and
- (d) general working capital.

The application of funds will depend on when Quoted Options are exercised and the status of the Company's projects and requirements at the relevant time.

The above is a statement of current intentions at the date of this Prospectus. Intervening events and new circumstances have the potential to affect the manner in which the funds are ultimately applied. The Board reserves the right to alter the way the funds are applied on this basis.

### **3.3 Substantial Shareholders**

Based on available information as at the date of this Prospectus, the only person, together with their associates, who has a voting power in 5% or more of the Shares on issue is Mr Simon (Sui Hee) Lee with a holding of 35,746,210 Shares and a voting power of 5.35%.

The Offer will not have an effect on the quantity of Shares held by existing Shareholders as only Quoted Options are being offered under this Prospectus.

### **3.4 Diluting effect of the Offer**

On the assumptions that:

- (a) all of the Quoted Options offered under this Prospectus are issued and exercised into Shares; and
- (b) no other Securities are issued or exercised (including the Options and Performance Rights currently on issue),

the diluting effect on the percentage interest of existing Shareholders' would be 6.24%.

### **3.5 Effect of the Offer on control of the Company**

The Company is of the view that the Offer will not affect the control (as defined by section 50AA of the Corporations Act) of the Company. No new investor or existing Shareholder will have a voting power greater than 20% as a result of the completion of the Offer.

### **3.6 Financial effect of the Offer**

The Company does not consider that the Offer will have a material effect on the financial position of the Company.

The Offer (assuming all Quoted Options are issued) will have an effect on the Company's financial position of increasing the cash balance by approximately \$3,000,000 (before costs).

### **3.7 Expenses of the Offer**

The expenses of the Offer will be met from the Company's existing cash reserves. The Offer will have an effect on the Company's financial position of reducing the cash balance by approximately \$44,906.

Please refer to Section 5.11 for further details on the estimated expenses of the Offer.

## **4. Risk Factors**

As with any investment in Securities, there are risks involved. This Section identifies the major areas of risk associated with an investment in the Company but should not be taken as an exhaustive list of the potential risk factors to which the Company and its security holders are exposed. Potential investors should read the entire Prospectus and consult their professional advisers before deciding whether to apply for Quoted Options.

The Directors consider that the following summary represents some of the major risk factors which Shareholders need to be aware of in evaluating the Company's business and risks of increasing your investment in the Company. Investors should carefully consider the following factors in addition to the other information presented in this Prospectus.

The principal risks include, but are not limited to, the following:

### **4.1 Risks specific to the Company**

#### **(a) Exploration & development risk**

Potential investors should understand that mineral exploration and development are high-risk undertakings. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited.

The future exploration and development activities of the Company may be affected by a range of factors, including geological conditions, limitations on activities due to seasonal weather patterns, unanticipated operational and technical difficulties, industrial and environmental accidents, native title process, changing government regulations and many other factors beyond the control of the Company.

In addition, the construction of any proposed development may exceed the expected timeframe or cost for a variety of reasons out of the Company's control. Any delays to project development could adversely affect the Company's operations and financial results and may require the Company to raise further funds to complete the project development and commence operations.

#### **(b) Future capital and funding requirements**

The Company has no operating revenue and is unlikely to generate any operating revenue unless and until its projects are successfully developed and production commences. The future capital requirements of the Company will depend on many factors including its business development activities. Should the Company require additional funding, there can be no assurance that additional financing will be available on acceptable terms or at all. Any inability to obtain additional financing, if required, would have a material adverse effect on the Company's business, financial condition and results of operations.

In order to successfully develop its projects and for production to commence, the Company will require further financing in the future, in addition to amounts raised pursuant to the Placement or on exercise of any Quoted Options. Any additional equity financing may be dilutive to Shareholders, may be undertaken at lower prices than the then market price or may involve restrictive covenants which limit the Company's operations and business strategy. Debt financing, if available, may involve restrictions on financing and operating activities.

Although the Directors believe that additional capital can be obtained, no assurances can be made that appropriate capital or funding, if and when needed, will be available on terms favourable to the Company or at all. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its activities and this could have a material adverse effect on the Company's activities, including resulting in the Tenements being subject to forfeiture, and could affect the Company's ability to continue as a going concern.

The Company may undertake additional offerings of Shares and of securities convertible into Shares in the future. The increase in the number of Shares issued and outstanding and the possibility of sales of such shares may have a depressive effect on the price of Shares. In addition, as a result of such additional Shares, the voting power of the Company's existing Shareholders will be diluted.

(c) **New projects and potential acquisitions**

The Company will actively pursue and assess other new business opportunities in the resources sector. These new business opportunities may take the form of direct project acquisitions, joint ventures, farm-ins, acquisition of tenements/permits, and/or direct equity participation.

The acquisition of projects (whether completed or not) may require the payment of monies (as a deposit and/or exclusivity fee) after only limited due diligence or prior to the completion of comprehensive due diligence. There can be no guarantee that any proposed acquisition will be completed or be successful. If the proposed acquisition is not completed, monies advanced may not be recoverable, which may have a material adverse effect on the Company.

If an acquisition is completed, the Directors will need to reassess at that time, the funding allocated to current projects and new projects, which may result in the Company reallocating funds from other projects and/or raising additional capital (if available). Furthermore, notwithstanding that an acquisition may proceed upon the completion of due diligence, the usual risks associated with the new project/business activities will remain.

## **4.2 Risks relating to the mining industry generally**

(a) **Resource risk**

There is inherent uncertainty with mineral resource and ore reserve estimates. Regardless of JORC Code or other status, there is a risk that actual mining performance will not deliver performance in line with mineral resource and ore reserve estimates.

(b) **Operating risk**

The operations of the Company may be affected by various factors, including failure to locate or identify mineral deposits, failure to achieve predicted grades in exploration and mining, operational and technical difficulties encountered in mining; difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs; adverse weather conditions, industrial and environmental accidents, industrial disputes and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.

No assurances can be given that the Company will achieve commercial viability through the successful exploration and/or mining of its Tenement interests. Unless and until the Company is able to realise value from its projects, it is likely to incur ongoing operating losses.

(c) **Metallurgy**

Metal and/or mineral recoveries are dependent upon the metallurgical process, and by its nature contain elements of significant risk such as:

- (i) identifying a metallurgical process through test work to produce a saleable metal and/or concentrate;
- (ii) developing an economic process route to produce a metal and/or concentrate; and
- (iii) changes in mineralogy in the ore deposit can result in inconsistent metal recovery, affecting the economic viability of the project.

(d) **Environmental risks**

The operations and proposed activities of the Company are subject to Australian laws and regulations in respect to the environment. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. It is the Company's intention to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws.

Mining operations have inherent risks and liabilities associated with safety and damage to the environment and the disposal of waste products occurring as a result of mineral exploration and production. The occurrence of any such safety or environmental incident could delay production or increase production costs. Events, such as unpredictable rainfall or bushfires may impact on the Company's ongoing compliance with environmental legislation, regulations and licences. Significant liabilities could be imposed on the Company for damages, clean up costs or penalties in the event of certain discharges into the environment, environmental damage caused by previous operations or noncompliance with environmental laws or regulations.

The disposal of mining and process waste and mine water discharge are under constant legislative scrutiny and regulation. There is a risk that environmental laws and regulations become more onerous making the Company's operations more expensive. Approvals are required for land clearing and for ground disturbing activities. Delays in obtaining such approvals can result in the delay to anticipated exploration programmes or mining activities.

(e) **Native title claims and Aboriginal heritage**

In the future if the existence of native title claims occur over the area covered by the Tenements, or a subsequent determination of native title over the area occurs, this will not impact the rights or interests of the holder provided the Tenements have been or will be validly granted in accordance with the *Native Title Act 1993* (Cth) (**NT Act**).

If any of the Tenements were not validly granted in compliance with the NT Act, this may have an adverse impact on the Company's activities. The Company is not aware of any circumstances to indicate that any of the Tenements were not or will not be validly granted in accordance with the NT Act.

The grant of any future tenure to the Company over areas that are covered by registered claims or determinations will likely require engagement with the relevant claimants or native title holders (as relevant) in accordance with the NT Act. The Directors will closely monitor the potential effect of native title claims involving the Tenements in which the Company has or may have an interest.

There remains a risk that additional Aboriginal sites may exist on the land the subject of the Tenements. The existence of such sites may preclude or limit mining activities in certain areas of the Tenements.

(f) **Third party tenure risks**

Under Western Australian, New South Wales, and Commonwealth legislation, the Company may be required, in respect of exploration or mining activities on the Tenements, to recognise the rights of, obtain the consent of, and/or pay compensation to the holders of third-party interests which overlay areas within the Tenements, including other mining tenure, pastoral leases or petroleum tenure.

The Company will continue to be required to negotiate access arrangements and pay compensation to land owners, local authorities, traditional land users and others who may have an interest in the area covered by a Tenement. The Company's ability to resolve access and compensation issues will have an impact on the future success and financial performance of the Company's operations. If the Company is unable to resolve such compensation claims on economic terms, this could have a material adverse effect on the business, results or operations and financial condition of the Company.

Any delays or costs in respect of conflicting third-party rights (for example, in relation to the assignment of any access agreements or the relocation of existing infrastructure on any existing miscellaneous licences that overlap with a Tenement), obtaining necessary consents, or compensation obligations, may adversely impact the Company's ability to carry out exploration or mining activities within the affected areas.

(g) **Rare earth elements and phosphate price and demand volatility and exchange rate risks**

If the Company achieves success leading to mineral production, the revenue it will derive through the sale of commodities may expose the potential income of the Company to commodity price and exchange rate risks. The price of rare earth elements (**REE**) and phosphate may fluctuate and are affected by numerous factors beyond the control of the Company, such as industrial and retail supply and demand,

exchange rates, inflation rates, changes in global economies, confidence in the global monetary system, forward sales of minerals by producers and speculators as well as other global or regional political, social or economic events. Future serious price declines in the market values of REE, phosphate, and other minerals could cause the development of, and eventually the commercial production from, the Company's projects and the Company's other properties to be rendered uneconomic. Depending on the prices of commodities, the Company could be forced to discontinue production or development and may lose its interest in, or may be forced to sell, some of its properties. There is no assurance that, even as commercial quantities of REE and phosphate are produced, a profitable market will exist for it.

Furthermore, international prices of various commodities are denominated in United States dollars, whereas the income and expenditure of the Company are and will be taken into account in Australian currency, exposing the Company to the fluctuations and volatility of the rate of exchange between the United States dollar and the Australian dollar as determined in international markets.

In addition to adversely affecting any potential future reserve estimates of the Company and its financial condition, declining commodity prices can impact operations by requiring a reassessment of the feasibility of a particular project. Such a reassessment may be the result of a management decision or may be required under financing arrangements related to a particular project. Even if a project is ultimately determined to be economically viable, the need to conduct such a reassessment may cause substantial delays or may interrupt operations until the reassessment can be completed.

(h) **Competition risk**

The industry in which the Company is involved is subject to domestic and global competition, including major mineral exploration and production companies. Although the Company will undertake all reasonable due diligence in its business decisions and operations, the Company will have no influence or control over the activities or actions of its competitors, which activities or actions may, positively or negatively, affect the operating and financial performance of the Company's projects and business.

The Company's current and future potential competitors may include entities with greater financial and other resources than the Company which, as a result, may be in a better position to compete for future business opportunities. Many of the Company's competitors not only explore for and produce minerals, but also carry out refining operations and other products on a worldwide basis. There can be no assurance that the Company can compete effectively with these entities.

(i) **Third party contractor risks**

The Company is unable to predict the risk of insolvency or managerial failure by any of the third party contractors used by the Company in any of its activities or the insolvency or other managerial failure by any of the other service providers used by the Company for any activity. The effects of such failures may have an adverse effect on the Company's activities.

(j) **Reliance on key personnel**

The Company is reliant on a number of key personnel and consultants, including members of the Board. The loss of one or more of these key contributors could have an adverse impact on the business of the Company.

(k) **Staffing**

It may be difficult for the Company to attract and retain suitably qualified and experienced people given the current high demand in the industry and relatively small size of the Company, compared with other industry participants.

(l) **Climate change**

There are a number of climate-related factors that may affect the Company's business. Climate change or prolonged periods of adverse weather and climatic conditions (including rising sea levels, floods, hail, drought, water, scarcity, temperature extremes, frosts, earthquakes and pestilences) may have an adverse effect on the Company's ability to access its Projects and therefore the Company's ability to carry out services.

Changes in policy, technological innovation and consumer or investor preferences could adversely impact the Company's business strategy, particularly in the event of a transition (which may occur in unpredictable ways) to a lower-carbon economy.

(m) **Occupational health and safety**

Site safety and occupational health and safety outcomes are a critical element in the reputation of the Company and its ability to retain and be awarded new contracts in the resources industry. While the Company has a strong commitment to achieving a safe performance on site a serious site safety incident could impact upon the reputation and financial outcomes for the Company.

Additionally, laws and regulations as well as the requirements of customers may become more complex and stringent or the subject of increasingly strict interpretation and/or enforcement. Failure to comply with applicable regulations or requirements may result in significant liabilities, to suspended operations and increased costs.

Industrial accidents may occur in relation to the performance of the Company's services. Such accidents, particularly where a fatality or serious injury occurs, or a series of such accidents occurs, may have operational and financial implications for the Company which may negatively impact on the financial performance and growth prospects for the Company.

(n) **Insurance**

The Company intends to continue to insure its operations in accordance with industry practice. In certain circumstances, the Company's insurance may not be of a nature or level to provide adequate insurance cover. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition and results of the Company. Insurance against all risks associated with mining exploration and production is not always available and where available the costs can be prohibitive.

(o) **Unforeseen expenses**

The Company's cost estimates and financial forecasts include appropriate provisions for material risks and uncertainties and are considered to be fit for purpose for the proposed activities of the Company. If risks and uncertainties prove to be greater than expected, or if new currently unforeseen material risks and uncertainties arise, the expenditure proposals of the Company are likely to be adversely affected.

#### **4.3 General risks**

(b) **General economic climate**

Factors such as inflation, currency fluctuations, interest rates, legislative changes, political decisions and industrial disruption have an impact on operating costs. The Company's future income, asset values and share price can be affected by these factors and, in particular, by exchange rate movements.

(c) **General market risks**

Share market conditions may affect the value of the Company's Securities regardless of the Company's operating performance. The Company is exposed to general market and economic condition risks including adverse changes in levels of economic activity, exchange rates, interest rates, commodity prices, government policies, inflation, events affecting global financial liquidity, employment rates and industrial disruption.

(d) **Government and legal risk**

Changes in government, monetary policies, taxation and other laws can have a significant impact on the Company's assets, operations and ultimately the financial performance of the Company and its Shares. Such changes are likely to be beyond the control of the Company and may affect industry profitability as well as the Company's capacity to explore and mine.

The Company is not aware of any reviews or changes that would affect its permits. However, changes in community attitudes on matters such as taxation, competition policy and environmental issues may bring about reviews and possibly changes in government policies. There is a risk that such changes may affect the Company's development plans or its rights and obligations in respect of its permits. Any such government action may also require increased capital or operating expenditures and could prevent or delay certain operations by the Company the future performance of the Company or any return on an investment in the Company.

(e) **Litigation risks**

The Company is exposed to possible litigation risks including native title claims, tenure disputes, environmental claims, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position. As at the date of this Prospectus, there are no material legal proceedings affecting the Company.

(f) **Force majeure**

Force majeure is a term used to refer to an event beyond the control of a party claiming that the event has occurred. Significant catastrophic events – such as war, acts of terrorism, pandemics, loss of power, cyber security breaches or global threats

– or natural disasters – such as earthquakes, fire or floods or the outbreak of epidemic disease – could disrupt the Company’s operations and interrupt critical functions, or otherwise harm the business. To the extent that such disruptions or uncertainties result in delays or cancellations of the deployment of the Company’s products and solutions, its business, results of operations and financial condition could be harmed.

(g) **Taxation**

The acquisition and disposal of Securities will have tax consequences, which will differ depending on the individual financial affairs of each investor. All potential investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Securities from a taxation point of view and generally. To the maximum extent permitted by law, the Company, its officers and each of their respective advisers accept no liability and responsibility with respect to the taxation consequences of applying for Securities under this Prospectus.

(h) **Unforeseen risk**

There may be other risks which the Directors are unaware of at the time of issuing this Prospectus which may impact on the Company, its operations and/or the valuation and performance of its Shares.

#### 4.4 **Investment speculative**

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the Quoted Options offered under this Prospectus.

Therefore, the Quoted Options to be issued pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Quoted Options.

Potential investors should consider that the investment in the Company is highly speculative and should consult their professional advisers before deciding whether to apply for Quoted Options pursuant to this Prospectus.

- (o) **(Adjustment for bonus issues of Shares):** If the Company makes a bonus issue of Shares or other securities to existing Shareholders (other than an issue in lieu or in satisfaction of dividends or by way of dividend reinvestment):
  - (i) the number of Shares which must be issued on the exercise of an Option will be increased by the number of Shares which the Option holder would have received if the Option holder had exercised the Option before the record date for the bonus issue; and
  - (ii) no change will be made to the Exercise Price.

## 5.2 Rights and liabilities attaching to Shares

A summary of the rights attaching to Shares in the Company is below. This summary is qualified by the full terms of the Constitution (a full copy of the Constitution and the Constitution is available from the Company on request free of charge) and does not purport to be exhaustive or to constitute a definitive statement of the rights and liabilities of Shareholders. These rights and liabilities can involve complex questions of law arising from an interaction of the Constitution with statutory and common law requirements. For a Shareholder to obtain a definitive assessment of the rights and liabilities which attach to Shares in any specific circumstances, the Shareholder should seek legal advice.

### (a) General meetings

Shareholders are entitled to be present in person, or by proxy, attorney or representative to attend and vote at general meetings of the Company. Shareholders may requisition meetings in accordance with section 249D of the Corporations Act and the Constitution.

### (b) Voting rights

Subject to any rights or restrictions for the time being attached to any class or classes of Shares, at general meetings of Shareholders or classes of Shareholders:

- (i) each Shareholder entitled to vote may vote in person or by proxy, attorney or representative;
- (ii) on a show of hands, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder has one vote; and

- (iii) on a poll, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder will, in respect of each fully paid Share held by him, or in respect of which he is appointed a proxy, attorney or representative, have one vote for the Share, but in respect of partly paid Shares will have such number of votes as bears the same proportion to the total of such Shares registered in the Shareholder's name as the amount paid (not credited) bears to the total amounts paid and payable (excluding amounts credited).

(c) **Dividend rights**

Subject to the rights of any preference Shareholders and to the rights of the holders of any shares created or raised under any special arrangement as to dividend, the Directors may from time to time declare a dividend to be paid to the Shareholders entitled to the dividend which will be payable on all Shares according to the proportion that the amount paid (not credited) is of the total amounts paid and payable (excluding amounts credited) in respect of such Shares.

No dividend will carry interest as against the Company.

The Company must not pay a dividend unless the Company's assets exceed its liabilities immediately before the dividend is declared and the excess is sufficient for the payment of the dividend. The Directors may capitalise any profits of the Company and distribute that capital to the Shareholders, in the same proportions as the Shareholders are entitled to a distribution by dividend.

(d) **Winding-up**

If the Company is wound up, the liquidator may, with the authority of a special resolution of the Company, divide among the shareholders in kind the whole or any part of the property of the Company, and may for that purpose set such value as he considers fair upon any property to be so divided, and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

(e) **Issue of further issues**

Subject to the Corporations Act and the Constitution, the Board may, on behalf of the Company, issue, grant options over or otherwise dispose of unissued shares to any person on the terms, with the rights, and at the times that the Board decides. The Company must not issue shares or grant options if the issue or grant would result in a breach of the Listing Rules.

(f) **Transfer of Shares**
