

# 3,000m RC program commences at Talonx gold projects

---

## HIGHLIGHTS

- Reverse Circulation (RC) drilling has commenced at the Blair North Gold Project, 25km east of Kalgoorlie
  - Drilling is targeting high-grade gold at the Commodore, Commodore North and Snake Hill prospects
  - The 10-hole ~1,800m program at Blair North is scheduled to take 1-2 weeks with initial results expected in May 2026
  - Following completion at Blair North the RC rig will mobilise to the Viking Project, 30km east of Norseman, to recommence RC drilling at the Beaker 2 and Beaker 4 prospects
- 

Talonx Resources Limited (ASX: TXR, “Talonx” or the “Company”) is pleased to advise that a 1,800m RC drilling program is underway at the Blair North Gold Project, located 25 kilometres east of Kalgoorlie.

### **Talonx Resources Executive Chairman, Dr Steve Lennon commented:**

*“Following our well-supported capital raising last month we are now well-funded and delighted to commence this drilling program at Blair North. There are a number of very exciting gold targets along the Commodore trend and also at Snake Hill which we have developed over the last few months.”*

*“Upon completion of the Blair North program, the Company looks forward to advancing drilling at the Viking Project. This will include follow-up of high-grade results from recent drilling at Beaker 2, in addition to Talonx’s first drilling at the Beaker 4 prospect.”*

The majority of planned drilling at Blair North will be conducted at Commodore and Commodore North, targeting quartz vein-hosted high-grade gold mineralisation. Several holes will be testing for extensions along strike and down-dip from previous drilling. In addition to drilling at the Commodore prospects, RC drilling at the Snake Hill prospect will be testing a number of structural and geochemical high-grade gold targets. The drilling at Blair North is scheduled to take two weeks to complete, with assay results expected in May.

**Figure 1.** Strike Drilling RC rig at Blair North

Previous results from drilling at Blair North include;

**COMMODORE**

- **BVD001**                      5.9m @ 6.7 g/t Au from 244.4m
- **BVD007**                      2.5m @ 7.4 g/t Au from 255.4m

**COMMODORE NORTH**

- **BVNC065**                      8m @ 1.0g/t Au from 74m, and  
2m @ 1.3g/t Au from 88m, and  
4m @ 1.7g/t Au from 96m
- **BVNC066**                      6 m @ 1.6 g/t Au from 40m
- **BVNC067**                      2 m @ 2.5 g/t Au from 105m
- **BVNC069**                      3 m @ 1.4 g/t Au from 92m

Figure 2. Blair North Project

Following the program at Blair North, the RC rig will mobilise south to the Viking Project, located 30km east of Norseman, where ~1,200m of planned drilling will test for extensions of high-grade gold mineralisation at the Beaker 2 and Beaker 4 prospects. Talonx's initial 867m RC program was conducted at the Beaker 2 prospect in December 2025 with result highlights including **5m @ 7.4g/t Au from 70m** and **14m @ 2.0g/t Au from 9m** (see [ASX announcement 27 February 2026](#)).

Best results from historic drilling at **Beaker 2** include:

- **16VKAC044**      6m @ 64.0g/t Au from 50m
- **17VKAC075**      2m @ 9.0g/t Au from 29m, and  
4m @ 15.4g/t Au from 40m
- **14VKRC017**      3m @ 8.2g/t from 40m

Drilling at the **Beaker 4** prospect has been designed to follow up historic drilling results which included:

- **14VKRC002**      6m @ 6.0 g/t Au from 73m
- **14VKRC001**      7m @ 3.8g/t Au from 31m
- **BKD009**          4.4m @ 6.6g/t Au from 56m
